

# Voice-Q™ 510 PAC

## FLEXIBILITY IN HIGH FIDELITY PERFORMANCE

The SeboTek® Voice-Q™ 510 PAC hearing instrument is the logical choice for candidates with mild-to-severe hearing loss, in any audiometric configuration, seeking a high fidelity listening experience in an extremely easy-to-use instrument.

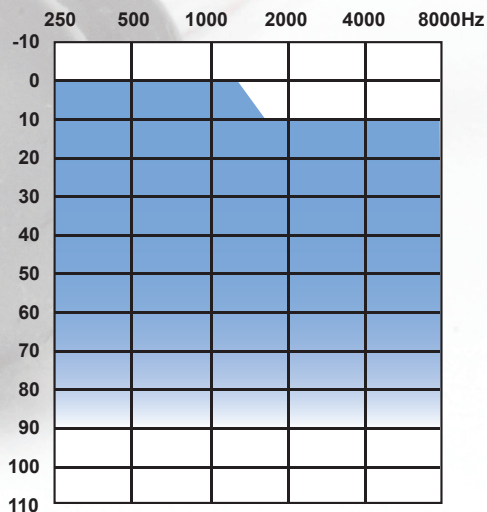

Model 510 is flexible, yet advanced, and provides up to two personalized listening programs to deliver true high fidelity acoustics in a discreet, visually satisfying product.

***Fits mild-to-severe losses***

***Free from occlusion effect***

***Designed to reduce the causes of feedback***

### Voice-Q™ 510 Fitting Range

### Key Features:

- Multi-channel WDRC
- 6-band graphic EQ
- Selectable Noise Manager
- Programmable Telecoil
- 2 user-selectable memories
- Long-life #13 battery
- Same-session, quick, and personalized fit

# MODEL 510

## The PAC – Different by Design

The PAC (Post Auricular Canal) hearing instruments are a revolutionary new style hearing system that combine state-of-the-art 32 kHz, 20-bit digital signal processing with a unique High Fidelity Acoustic Coupling (HiFi AC™) system for the truest possible replication of sound.

### Deep Canal Fit Benefits

- Clinically proven to eliminate the occlusion effect
- Effective management of feedback
- High-fidelity, distortion-free sound

### Maximizes gain acoustically

- Up to 18 dB of additional acoustic gain
- High speed, high resolution digital signal processor
- Extended headroom, low distortion
- 14 kHz bandwidth

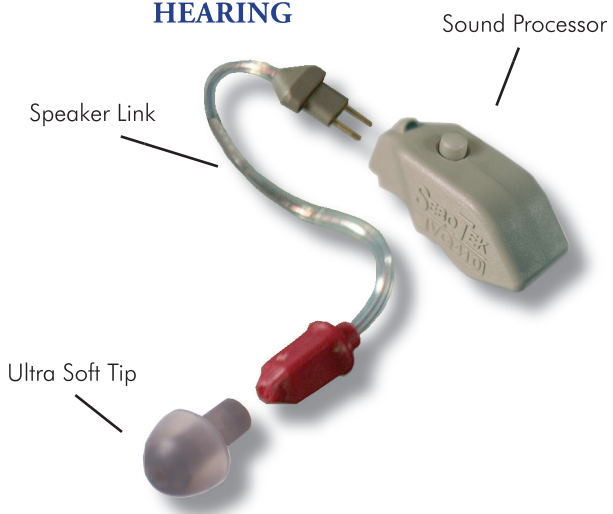

### High Fidelity Acoustic Coupling (HiFi AC™)

- Speaker Link and Ultra-Soft Tip dynamically adapts to any ear canal
- Floating speaker leaves the canal feeling open, free and natural
- Allows personalized fit and on-site service in minutes

### Extended Microphone Separation (EMS™)

- Separation of microphone and speaker, far greater than traditional instruments
- No venting is required, minimizing most common source of feedback
