

# Voice-Q™ 720 PAC

## FULL-FEATURED PERFORMANCE IN ALL ENVIRONMENTS

The SeboTek® Voice-Q™ 720 PAC hearing instrument is the high-performance choice for candidates with mild-to-severe hearing loss, in any audiometric configuration, seeking a high fidelity listening experience and the added benefits of matched dual directional microphones.

Model 720 provides up to four personalized listening programs to deliver true high fidelity acoustics in a discreet, visually satisfying product.

***Fits mild-to-severe losses***

***Free from occlusion effect***

***Designed to reduce the causes of feedback***

### Voice-Q™ 720 Fitting Range

### Key Features:

- Dual directional microphone system
- 4 user-selectable memories
- 4-Channel WDRC
- Programmable Telecoil
- Extended Frequency Response Contouring
- Long-life #13 battery

## The PAC – Different by Design

The PAC (Post Auricular Canal) hearing instruments are a revolutionary new style hearing system that combine state-of-the-art 32 kHz, 20-bit digital signal processing with a unique High Fidelity Acoustic Coupling (HiFi AC™) system for the truest possible replication of sound.

### Deep Canal Fit Benefits

- Clinically proven to eliminate the occlusion effect
- Effective management of feedback
- High-fidelity, distortion-free sound

### Maximizes gain acoustically

- Up to 18 dB of additional acoustic gain
- High speed, high resolution digital signal processor
- Extended headroom, low distortion
- 14 kHz bandwidth

### High Fidelity Acoustic Coupling (HiFi AC™)

- Speaker Link and Ultra-Soft Tip dynamically adapts to any ear canal
- Floating speaker leaves the canal feeling open, free and natural
- Allows personalized fit and on-site service in minutes

### Extended Microphone Separation (EMS™)

- Separation of microphone and speaker, far greater than traditional instruments
- No venting is required, minimizing most common source of feedback
