

*I'm Listening*

My world is a blur. My job.  
My life. Keeps me running  
laps on the freeway.  
The noise. The traffic.  
The mess. But I stay in  
touch. Constantly. And  
hands-free. I am listening.  
And safely driving with a  
Westone® custom earmold  
for my cell phone headset.

 **Westone**

*Are You Listening?*

Are your cell phone minutes starting to match the mileage on your car? Ever wish you could talk on your cell while you clean house or hang from the monkey bars with the kids? Then check out the convenience and comfort of Westone's® hands-free products. Westone® creates custom earmolds for virtually any hands-free headset — so you keep in touch comfortably all day. Add a Cell Phone Amplifier to overcome background noises, poor signal connections or a mild hearing loss, and you have a hands-free package that will see you through that dawn to dusk routine. See your hearing healthcare professional and ask about Westone® hands-free cell phone products. *You'll want to listen.*

**Use your cell phone comfortably and safely — hands free!**

Westone® features hands-free communications solutions for every cell phone user. Ear pieces are custom-molded from an impression of your ear — a quick and simple process.

We can make a custom earpiece for your headset. Or we can provide you with one of Westone's high quality headsets to complete the package. Regardless of which headset you use, a Westone® custom earpiece can improve sound quality, increase comfort and make the headset more secure in your ear.

**Westone® can improve the clarity of your cell phone**

---

Hear cell phone conversations accurately, even in noisy environments, with Westone's new Cell Phone Amplifier.

---

Appropriate for individuals with mild hearing loss, the amplifier compensates for a cell phone's low volume output to overcome background noise or poor signal connections.

---

A simple three position switch regulates amplification.
