

# PRACTICAL DIGITAL SOLUTIONS

Unitron Hearing's complete range of hearing solutions takes full advantage of digital technology to address the real, everyday problems of hearing loss and hearing aids.

**Conversa** – the highly advanced solution to your clients' top concerns: feedback, telephone use, occlusion and understanding conversation in noise.

- ▶ 16 independent channels of compression
- ▶ Realtime feedback canceller reacts within milliseconds to provide precise and adaptive cancellation
- ▶ ClearCall eliminates the need for a telecoil for telephone and cell phone use
- ▶ ClearPath™ Technology, three sophisticated technologies working together to optimize speech intelligibility and listening comfort:
  - Intelligent noise reduction enhances speech while reducing annoying background noise
  - Vector directional microphone standard on BTE, optional for full-shell, half-shell and canal
  - ClearPath processing strategy applies the appropriate scheme for every input level; quiet mode expansion, linear, WDRC, compression limiting
- ▶ Up to three programs for different listening environments
- ▶ Start up mute
- ▶ CIC to full-shell, BTE and Power BTE

**Unison 4** – the fully featured, accessible digital solution.

- ▶ 4 independent channels of compression
- ▶ 4 processing choices to tailor to client needs
  - Digital WDRC<sup>4</sup>
  - ASP Noise Suppression
  - Adaptive Compression
  - Linear Limiting
- ▶ Vector directional microphone standard on BTE, optional on full-shell, half-shell and canal
- ▶ Quiet Mode Expansion for improved sound quality in quiet environments
- ▶ Static feedback manager
- ▶ Up to 3 programs for different listening environments
- ▶ CIC to full-shell, BTE and Power BTE

**Unison 2** – simplified for first-time clients and previous analog wearers.

- ▶ 2 independent channels of compression
- ▶ Digital WDRC with Linear capabilities
- ▶ Vector directional microphone standard on BTE, optional on full-shell, half-shell and canal
- ▶ Quiet Mode Expansion for improved sound quality in quiet environments
- ▶ Static feedback manager
- ▶ 2 programs for different listening environments
- ▶ CIC to full-shell, BTE and Power BTE

**Unison 2 Single Memory** – digital hearing aid at conventional price.

- ▶ 2 independent channels of compression
- ▶ Digital WDRC with Linear capabilities
- ▶ Quiet Mode Expansion for improved sound quality in quiet environments
- ▶ Static feedback manager
- ▶ CIC to full-shell, BTE and Power BTE

**A refreshingly practical approach to hearing solutions.  
Easy to select. Easy to fit.**
