

Is Conversa Right for You?

If you lead an active lifestyle, have a mild to severe/profound hearing loss and are looking for outstanding convenience and listening comfort, plus a better solution to the most common complaints with hearing instruments, Conversa may be the ideal choice for you. Conversa is available in the full range of styles, from the tiniest CIC (Completely-in-the-Canal) to a full-size BTE (Behind-the-Ear). Talk to your hearing healthcare professional to choose the hearing instrument style and features that best meet your needs.

Life is a pleasure. Listening can be too.

PRACTICAL SOLUTIONS TO EVERYDAY PROBLEMS

For 40 years, Unitron Hearing has been committed to making life better for people with hearing loss. To us, this means a commitment to not only develop high-quality hearing solutions, but to incorporate special features that really solve the everyday problems and concerns you have with hearing loss and hearing aids. To you, this means a company that's listening – and responding – to what matters in your life.

SAY HELLO TO A BETTER LISTENING EXPERIENCE

Listening should be a pleasure. Whether you currently wear hearing aids or have recently been diagnosed with a hearing loss, you may be missing out on all the pleasures that a good listening experience has to offer. From taking an active part in your work and social life to catching up with friends and family on the telephone, Conversa™ lets you reconnect with the people and activities you enjoy – conveniently and comfortably.

Conversa is the first hearing aid you'll want to wear all the time. That's because it's the first hearing aid designed to solve the four greatest concerns of hearing aid users:

- ▶ **Experience Pure Listening**

Conversa reduces loud and embarrassing whistling from the hearing aid, which can happen in a multitude of situations and environments.

- ▶ **Enjoy the Telephone Again**

Never before has a hearing aid so thoroughly addressed the challenges of talking on the telephone. Conversa's ClearCall technology lets you relax and pick up the phone without fiddling with switches or experiencing uncomfortable feedback.

- ▶ **Sound More Like Yourself**

Many hearing aid wearers complain that the sound of their own voice is hollow and disconcerting. With Conversa, you'll sound more like yourself again.

- ▶ **Hear What People Have to Say**

No more missed conversations, overwhelmingly loud sounds or distracting background noise. Conversa's ClearPath™ technology connects you to the voices you want to hear and diminishes the background noise you don't.

EXPERIENCE PURE LISTENING

Conversa Virtually Eliminates Whistling Before it Can be Perceived

Whistle while you work shouldn't be the case with hearing aids, but until Conversa, this annoying whistling – or feedback – has often been the reality. If you wear hearing aids now, you may have experienced whistling when you talk, chew, put on a hat, pick up the phone or hug someone.

Conversa's revolutionary feedback technology dramatically reduces whistling before you or anyone else can perceive it, resulting in the clearest most natural sound possible.

ENJOY THE TELEPHONE AGAIN

Enjoy Your Phone Conversation Without Touching a Thing

The telephone is a vital tool in our everyday lives, but for those who wear hearing aids the phone can fast become the enemy – loud whistling, buttons to fiddle with, programs to remember. It's time to relax and pick up the phone again.

Conversa features ClearCall technology, a breakthrough telephone solution for hearing aid wearers: when the phone rings, all you have to do is pick it up and enjoy your conversation. ClearCall lets you use the telephone or cell phone without any adjustments or feedback. It even allows you to enjoy all these conveniences on smaller hearing aid styles as a standard feature.

SOUND MORE LIKE YOURSELF

You Can Have it All – No Feedback Plus a More Natural Sounding Voice

Many hearing aid wearers complain that their hearing aids make their own voices sound disconcerting. A comment heard time and again is “I feel like I’m talking inside a barrel.” Other complaints include a hollow, booming or echoing sound when talking.

With Conversa, you’ll sound more like yourself again. Conversa incorporates venting that makes your voice sound more natural without the risk of feedback – a complaint often encountered with other hearing aids.

HEAR WHAT PEOPLE HAVE TO SAY

Conversa with ClearPath™ Technology Diminishes Background Noise and Connects You to the Voices You Want to Hear

Conversa resolves the top complaint of hearing aid wearers – how difficult it is to enjoy a conversation in large groups or anywhere there's background noise, such as kitchen appliances or when you're riding in a car. Conversa features ClearPath – a group of technologies that work together to help you understand speech in noise.

The ClearPath directional system connects you to the voices and sounds directly in front of you by decreasing the amplification of sounds beside and behind you. Simultaneously, ClearPath analyzes all the sounds you're exposed to and automatically diminishes background noise – such as the hum and clatter in a busy restaurant – while preserving the sounds you want to hear, such as speech and music.

SAY HELLO TO SO MUCH MORE

Sophisticated Digital Features Plus Practical Solutions to the Most Common Complaints

Conversa resolves the top four concerns of hearing aid wearers and also features the most requested capabilities of a sophisticated digital hearing aid. These include:

- ▶ **Up to three listening programs** that can be customized to your listening environments. Change programs with an easy push-button, or choose to have them disabled
- ▶ **Program beep indicator** that lets you know which program you're using and when you change programs
- ▶ **Low battery indicator** that conveniently lets you know before your battery needs replacing
- ▶ **Manual volume control** if you prefer full control over amplification levels
