

THE G.R.O.U.P. - THE GROUP REHABILITATION ONLINE UTILITY PACK

INTRODUCTION

Authors of the GROUP explain why Group AR is rewarding and beneficial for both the hearing care professional and the hearing impaired person.

WHAT IS THIS TOOL?

The GROUP is an easy-to-use, online guide to help audiologists and other hearing care professionals develop their own Group AR program.

The guide uses a combination of videos of real-life Group AR sessions and content from leading Group AR experts to help you develop and start your own program.

WHAT IS GROUP AR?

The purpose of group aural/audiological rehabilitation is to help hearing-impaired persons and their communication partners adjust to their hearing loss, make the best use of their hearing aids, better manage conversations and increase self-advocacy.

Aural/Audiological rehabilitation in a group setting can help participants develop a sense of community and learn from each other about living with hearing loss.
